

DOCTORS FOR SAFER SCHOOLS

A non-profit international advisory board
working to protect children's health
in this Digital Age

Co-founder, Medical Director:
Stephen Sinatra, MD, FACC
(American College of Cardiologists)

Co-founder, Executive Director:
Kerry Crofton, PhD

Medical Advisor:
Brendan Montano, MD

Board Members:
John Barnhill, MD, FRCSC
(Royal College of Surgeons)

Martin Blank, PhD

Lee Cowden, MD

Carolyn Dean, MD

Magda Havas, PhD

Dietrich Klinghardt, MD

Heather E. McKinney, Ph.D

Hans Scheiner, MD

Public talk in Victoria, BC – October 23

Stephen Sinatra, MD, FACC Board-Certified Cardiologist, and **Martin Blank, PhD** Associate Professor of Physiology and Cellular Biophysics, Columbia University with Victoria health educator and author, **Kerry Crofton, PhD**.

Dr Sinatra cautions, "The wireless microwave radiation from WiFi and mobile phones is the **greatest medical threat of our time**. The heart is vulnerable; cardiac symptoms may be connected. Electro-sensitivity is a medical condition that most physicians do not recognize."

Dr Blank has published over 200 papers on his research, "This is not only the new tobacco; this is **the new asbestos**. It took governments 100 years to take action regarding asbestos. And Canada's safety standards are inaccurate and totally irrelevant."

Dr Crofton, co-founder Doctors For Safer Schools, and the author of *A Wellness Guide For The Digital Age*, "Yes, we want children to be tech-savvy; we can do this with the **safer use of digital technology** and adopting the precautionary principle."

International health authorities have issued health alerts:

- **The World Health Organization**, 2011: After examining the scientific evidence, a working group of 31 scientists determined wireless (RF) radiation to be a class 2B carcinogen – in the same category as lead, automotive exhaust, and DDT.
- **American Academy of Pediatricians**: "Children are disproportionately impacted by all environmental exposures, including cell phone radiation. It is essential that any new standard be based on protecting the most vulnerable populations to ensure they are safeguarded throughout their lifetimes."
- **American Academy of Environmental Medicine**: "Adverse health effects from RF radiation – learning disabilities, altered immune responses, and headaches – are well documented in the scientific literature. It is better to exercise caution and substitute with a safe wired connection – not classified as a possible carcinogen."

Provincial Health Officer Dr Kendall and Chief Medical Officer, VI Health Authority, Dr Stanwick, and other government, school board and library board officials, have been invited to attend this talk, or Dr Sinatra's lecture at the Jubilee Hospital.

**Wednesday, October 23, 2013, 4:30 pm St. John's Church Hall,
925 Balmoral, Victoria, BC**
